Farm sales less than \$234,669 NOTE: Small agricultural areas to which no value is assigned may have had value of sales approximating the value for a dot. Similarly, small areas to which one dot only is assigned may have had value of sales somewhat less than the value for a dot. In the absence of precise information for these small areas, values were assigned by judgment. However, the number of dots is correct for the census division in which these small agricultural areas are contained.
