MAP 944A
BEAVERLODGE
WEST OF SIXTH MERIDIAN
ALBERTA
(PRELIMINARY EDITION)

Scale: One Inch to Two Miles = $\frac{1}{126,720}$

NOTE: In these areas the topography is of a very
distinctive character, but too small to be shown on map.
Sand ridges of the "Barrens" (horseshoe-shaped)
type, lightly wooded, are the predominant features.
These are interspersed with small irregular swamps
covering from 30 to 60 percent of the areas.
